

ADITI GARG

AI / ML ENGINEER

📞 9412432591 | ✉️ aditi23garg@gmail.com | 📍 Gandhinagar, Gujarat - 380355

SUMMARY

AI/ML Engineer with experience in Python development, machine learning workflows, Generative AI applications, and backend automation. Skilled in building AI-powered solutions using Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), NLP, and predictive analytics. Experienced in Python-based application development, SQL data handling, AI assistant development, and cloud-based AI workflows. Strong understanding of model evaluation, prompt engineering, intelligent automation, and scalable AI solution development.

EDUCATION

IIT Gandhinagar 02/2026 – Present
PG Diploma in AI/ML and Agentic AI Engineering

Bharat Institute of Technology, Meerut 08/2016 – Oct 2020
B.Tech – Electronics and Communication Engineering (Percentage: 82.3%)

EXPERIENCE

Consultant — Capgemini 03/2025 - 08/2025
Pune, India

- Developed and maintained Python-based applications in production environments.
- Automated critical monitoring and operational tasks using customized Python workflows.
- Wrote and optimized complex SQL queries for rigorous data validation and issue investigation.
- Performed structured unit testing and automated validation checks using PyTest to ensure reliability.

Associate Analyst — Vaco Binary Semantics LLP 11/2023 - 10/2024
Gurugram, India

- Supported, updated, and scaled internal proprietary tools using Python core functionalities.
- Debugged production issues, resolved performance bottlenecks, and introduced systematic code enhancements.
- Created targeted SQL queries for continuous business reporting and deep-dive analytical metrics.
- Collaborated actively with QA engineering teams to validate builds and maintain platform stability.

KEY PROJECTS

Delivery Delay Prediction Machine Learning

- Developed an end-to-end predictive model to accurately forecast logistics and shipment delays using historical supply chain datasets.
- Executed complete feature engineering, data preprocessing, and exploratory predictive analytics using Python and Scikit-learn.
- Significantly boosted prediction accuracy through advanced hyperparameter model optimization and rigorous validation techniques.

Voice AI Agent

Generative AI & NLP

- Built an intelligent conversational voice assistant combining advanced NLP modules, precise speech-to-text workflows, and Large Language Model integrations.
- Implemented production-ready conversational workflows utilizing detailed prompt engineering and smart context-aware response handling.
- Integrated external APIs and real-time automation streaming pipelines for fluid, low-latency voice interactions.

NCERT Science Study Assistant LLM

Generative AI & RAG

- Designed and deployed an interactive educational AI assistant engineered on a Retrieval-Augmented Generation (RAG) framework.
- Implemented semantic vector search and highly contextual question-answering pipelines utilizing production LLMs.
- Tailored highly optimized student-friendly workflows for complex science concept breakdowns and interactive learning assistance.

TECHNICAL SKILLS

Languages	Python, SQL
AI/ML & GenAI	Machine Learning, Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), NLP, Prompt Engineering, AI Agents, Model Evaluation, AI Security
Frameworks & Libs	Pandas, NumPy, Scikit-learn, LangChain, Transformers, PyTest
Databases	PostgreSQL, MySQL
Tools & Platforms	Jupyter Notebook, PyCharm, VS Code, GitHub, Azure Cloud

CERTIFICATIONS

Applied Data & Business Analytics Micro-Degree Program — Jobaaj Learnings	Apr 2026
Pandas – Practice Problems and Challenges — CodeChef	Apr 2026
NumPy – Practice and Challenges — CodeChef	Mar 2026
Git/Github — CodeChef	Mar 2026
Data Engineering Foundations Specialization — IBM	Jul 2025
Python for Data Science, AI & Development — IBM	Jun 2025
